

Some time ago  
someone asked us,

**“Why doesn't anyone make  
woodworking machinery  
for people in wheelchairs  
or for individuals with  
limited mobility?”**

We answered with a question  
of our own, **“Hmm, why don't  
we?”**

Introducing **“Access by  
General”** - making the  
workshop accessible to  
everyone.

Made primarily in our Drummondville,  
Quebec, Canada plant we offer you  
the high end “Access by General”  
line which includes a selection of  
the most commonly used machines  
found in a typical woodworking shop  
such as: table saw, jointer, bandsaw,  
drill press and lathe.

Access by General is designed and  
adapted for the wheelchair user, the  
seated operator or for individuals of  
smaller stature where traditional  
sized machinery can be cumber-  
some, awkward or downright dan-  
gerous. Over the years we have  
marvelled at the determination and  
inventiveness of many strong willed  
individuals who face these chal-  
lenges every day and manage to  
adapt to and overcome the obstacles  
they face when working with tradi-  
tional sized machinery. Their pas-  
sion for woodworking is their motiva-  
tion and this is a passion that we fully  
understand.

For those who share this passion  
with us but have been held back by  
either the daily challenges you face  
or the obstacles presented by tradi-  
tional machinery, we offer you:

**“Access by General”**

**ACCESS**  
BY GENERAL®

Easy access  
front mounted  
switch.

Versatile design  
featuring a pivoting  
head allowing for  
off table work on  
extra long work  
pieces.

Accurate, heavy-  
duty depth stop  
with depth indica-  
tor scale in 1/8”  
increments.

17" x 32"  
auxiliary table  
included

**OVERALL  
HEIGHT:  
57 1/2"  
(1461 mm)**

**AC34-01  
15" DRILL PRESS - 6 Speed**

Ultra heavy-duty design - with a  
precision machined full cast-  
iron base, table and head  
mounted on a high quality  
steel column.

High quality steel locking levers  
secure the table and head in  
place for smooth stable drilling.

Sturdy and smooth hand crank  
operated table height adjust-  
ment system.

Powerful industrial rated totally  
enclosed fan cooled (T.E.F.C.)  
motor.

**Motor : 3/4 HP**

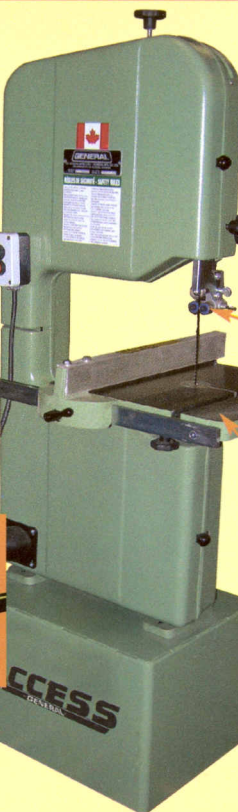

**Speed : 460, 815, 1260, 1935, 2970 &  
4910 RPM**

Moveable  
switch on  
magnetic  
base.

Deluxe 24" x 24"  
x 1 1/4" auxiliary  
table & deluxe  
EXCALIBUR rip  
fence system  
included.

**CLEARANCE  
UNDER TABLE  
31 1/4"  
(794 mm)**

Equipped with  
deluxe, hard-  
ened steel,  
upper and  
lower guide  
bearings.

Full cast-iron  
table with dual  
trunnion tilting  
mechanism.  
Table tilts 45°  
right, 10° left.

**AC490-1-MAG  
15" WOOD CUTTING BANDSAW**

High quality precision  
machined one-piece  
cast-iron frame.

Precision machined  
dynamically balanced cast-  
iron wheels with replaceable  
rubber tires for smooth  
vibration free operation.

Powerful industrial rated totally  
enclosed fan cooled (T.E.F.C.)  
motor.

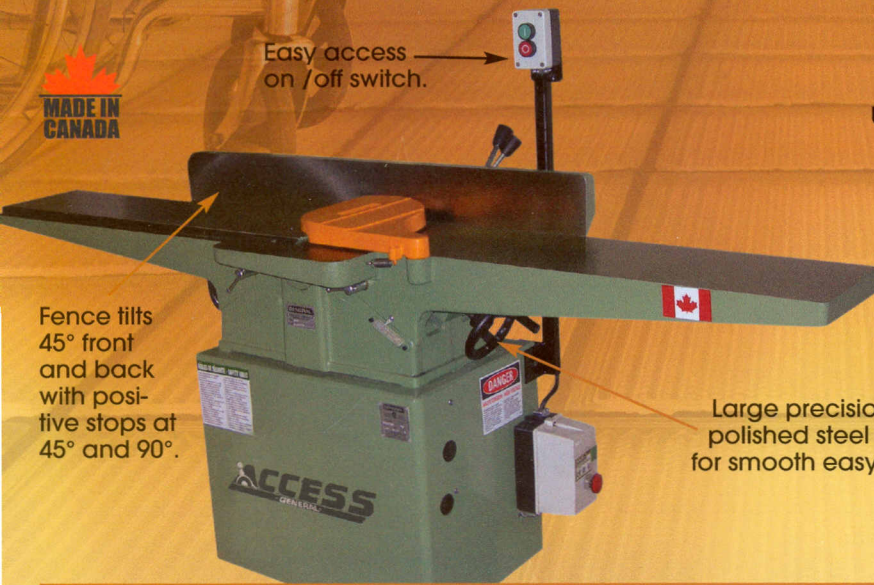

**Motor : 1 HP**

**Blade length : 100" (2540 mm)**

Easy access on /off switch.

Fence tilts 45° front and back with positive stops at 45° and 90°.

Large precision machined, polished steel hand wheels for smooth easy table height adjustments.

**CLEARANCE UNDER TABLE**  
25"  
(635 mm)

**AC480-1**

### 8" DELUXE JOINTER - *Extra long Table*

Precision machined and polished, heavily ribbed cast-iron tables, fence and frame.

Top quality, one-piece machined steel cutterhead mounted on 2 sealed permanently lubricated bearings.

Powerful industrial rated totally enclosed fan cooled (T.E.F.C.) motor.

**Motor : 1 1/2 HP**

**Cutter head speed : 4500 RPM**

Precision machined & polished cast-iron table.

Magnetic switch with overload protection for greater safety.

2 miter gauge T-slots and deluxe cast-iron miter gauge.

Large, heavy-duty cast-iron hand wheels for effortless blade adjustments.

Powder coated, scratch resistant, high quality reinforced steel cabinet.

**CLEARANCE UNDER TABLE**  
26"  
(660 mm)

**AC650-T50**

### 10" TILTING ARBOR SAW - *Left Tilt*

Heavy-duty, precision machined cast-iron trunnions.

Dual V-belt drive on precision balanced cast-iron pulleys.

Blade arbor mounted on heavy-duty, permanently lubricated sealed bearings.

Powerful industrial rated totally enclosed fan cooled (T.E.F.C.) motor.

**Motor : 3 HP or 5 HP available**

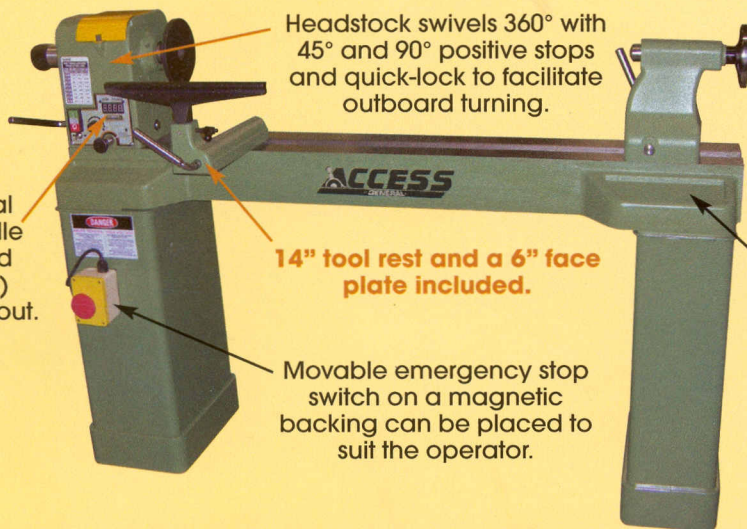

**Arbor speed : 4000 RPM**

Digital spindle speed (RPM) readout.

Headstock swivels 360° with 45° and 90° positive stops and quick-lock to facilitate outboard turning.

14" tool rest and a 6" face plate included.

Movable emergency stop switch on a magnetic backing can be placed to suit the operator.

**OVERALL HEIGHT:**  
43"  
(1092 mm)

**AC25-650 M1**

### 16" X 42" WOOD TURNING LATHE

Electronic inverter for variable speed adjustment between 0-3750 RPM.

Forward or reverse spindle rotation.

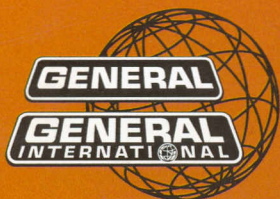

Quiet, highly efficient, low power consumption motor.

Low/High speed change lever for quick belt position changing.

**Motor : 1 1/2 HP**

**ELECTRONIC VARIABLE SPEED**

*Patent No. : US D 504, 140S*
